WORK EXPERIENCE

POD

May 2025 - Aug 2026

Senior Software Engineer (Full-time)

Remote

- Rebuilt the marketing website from scratch with mobile-first responsiveness in close collaboration with designers, introducing micro-interactions and motion design, improving Lighthouse score to 90+ and strengthening SEO using PayloadCMS for content management.
- Designed and implemented the mobile experience for the bet tracker page, significantly improving usability and interaction flow for mobile users.
- Led evaluation and end-to-end delivery of native mobile apps using Capacitor by restructuring the codebase for web/mobile separation and handling App Store and Play Store releases, overcoming iOS Safari PWA notification limitations.
- Made the codebase AI-ready by defining `AGENTS.md` and `DESIGN.md` workflows, and establishing a scalable engineering system through CI automation (linting, type-checking, builds), enforced code quality standards, and developer experience improvements including formatting, PR templates, and conventional commits.
- Partnered with an external product studio to ship a V2 POD dashboard spanning alerts, tracker, and wire modules, improving overall product UX across multiple workflows.

Stack: Next.js, TypeScript, Clerk, tRPC, Prisma, PayloadCMS, shadcn/ui, Tailwind CSS, Capacitor.js, React, Zustand, Markdown

Harmoney
